Print Audit 6
Features Sheet

Standard Features and Benefits

- Easy enterprise wide installation to any number of machines.
- Tracks 100% of printing, including local, networked, USB and direct to IP.
- Network push-install tool.
- Powerful security that ensures all jobs are tracked.
- Support for SQL or Access back-ends.
- Client-based architecture for low network overhead.
- Does not require a print server.
- Easy and secure configuration from any workstation.
- Network integration with Windows NT, Active Directory and Novell Directory Services.
- Scheduling/emailing of reports.

Analysis

- Tracks printing silently behind the scenes.
- Contains a powerful volume analysis reporting tool that will help identify equipment inefficiencies and bottlenecks.
- Tracks device port, duplex information, number of pages, number of copies, network user and much more.
- Installs silently to tens, hundreds or thousands of workstations.
- Automatic color and monochrome tracking at the page level.
- Stores detailed information about every device that prints.
- Automatically builds inventory lists of every user, printing device and computer.

Rules

- Utilize printing limits with highly customizable pop-up messages to notify users of print job costs before they print and suggest lower cost alternatives.
- Create advanced rules to limit printing based on conditions such as job cost, job size, the user, the application, time printed, color usage and much more.
- Maintain document security and regulatory compliance by implementing rules that can prevent confidential documents from being printed or inform you when they are printed.
- Redirect print jobs from high-cost to low-cost devices.
- Control color usage based on the number of color pages in a job, the printer, the application being printed from, the user and the computer.
- Encourage or force users to print on both sides of the page or with multiple pages on a sheet (N-up).
- Override pricing with custom rules.

Recovery

- Optional job code validation through a user-friendly popup window.
- 5 customizable fields that can be paired together for validation.
- Create custom fields based on the printer or application.
- Utilize user PIN codes for charging users.
- Set declining balances based on cost, total pages, color pages, or black & white pages.
- Specify devices and applications to track or not.
- Job snoozing and job batching functionality.
- Charge your customers or users by the page or by the paper size.
- Export data into virtually all accounting systems.
- Designed to work with all popular CAD systems.
- Integrates seamlessly with Print Audit's Copy Audit and Embedded solutions.
