## Print Audit Embedded

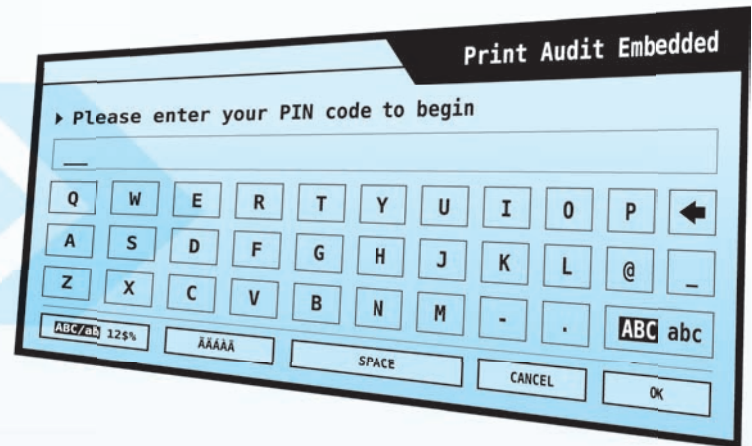

allows you to take complete control over your document creation costs.

### ► Embedded can help you:

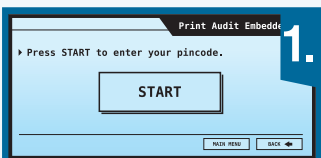

- Receive audit trails for all of the documents created at your multifunction devices.
- Seamlessly integrate desktop printing data collected with Print Audit 5.
- Eliminate additional hardware or wiring at your multifunction device.
- Reduce your waste and help support **your company's green initiatives**.

### ► Tracking Features

- Track, control, and charge for your walk-up copies, faxes and scans, recapturing 100% of your costs.
- Track printing from your document server.
- Utilize user quotas, PIN codes and declining balances.
- Authenticate users directly on the copier touch screen user panel.
- Distinguish between color and black and white copy jobs.
- Export all of your collected data into any accounting system.

### ► How it Works

1. The device panel prompts for information that you specify, such as PIN code to identify the user.

2. The device is unlocked allowing the job to be completed at the copier.

3. Job information (such as the user, number of pages, color information and more) is sent to a central database.

4. Reports can be generated at any workstation for billing purposes.
