Print Audit® Nails Local Tracking with Facilities Manager 2.21

Print Audit Releases significant update for Facilities Manager with enhanced local device tracking, Spanish language support and many other improvements

Calgary, Alberta - August 28, 2012 - Print Audit®, the print management company, has released a significant update for its remote device management solution, Facilities Manager, which includes innovative new local print device tracking options. The industry has been waiting for a solution that accurately tracks 100% of locally attached print devices. With this new release of Facilities Manager, Print Audit has the solution that every MPS provider needs.

Facilities Manager is a powerful, easy to use managed print services tool designed to remotely collect meter reads, automate supplies fulfillment and report service information for managing fleets of printers, copiers, fax machines and multi-function devices. The product is currently used by over 900 dealers worldwide and boasts a 40% market share in the United States.

The latest release of Facilities Manager also includes Spanish language support as well as several reporting improvements, including the ability to export data into Evatic Service Management System and enhancements to the program's integration with eAutomate.

Print Audit will be hosting a webinar on Monday, September 10th at 11am EDT to provide an overview of the new local device tracking features and other changes in Facilities Manager 2.21. Please register for the webinar at the following URL:
